PROFILE

4th-year Information Technology student majoring in Game Development, with a strong interest in blending technical and creative work. Currently seeking a second full-time internship (approximately 3 months) that aligns with my studies and offers hands-on experience, ideally one that could also form the basis of my thesis.

EDUCATION

Bachelor's Degree in Information Technology — Game Development major

Metropolia University of Applied Sciences, Espoo, Finland | 2022 – Ongoing | GPA 4,08

TECHNICAL SKILLS

Programming Languages: C#, Python, C++, JavaScript, HTML

Frameworks & Tools: React, Tailwind CSS, Flask, MongoDB

Game Development: Unity, Blender (Basic), Unreal Engine (Basic)

EXPERIENCE

- **AI Chatbot Internship** | May – August 2026 | Nokia / Metropolia Software Factory

Developed backend services in Python using Flask and MongoDB; built a JavaScript/HTML frontend for testing, integrated into a larger project built with the Unity game engine.

- **Unity Developer - Games Against Misinformation, Erasmus+ Exchange** | May – June 2026

Lodz University of Technology, Poland. Developed a small video game in Unity aimed at raising awareness about misinformation, as part of an international exchange program.

PROJECTS

Multiple projects developed during studies, mostly in Unity. See my [Portfolio Website](#) for details.

- **Puppeteer** - 2D video game; programmer & designer; Unity, C#; group project.
- **Jointed** - 3D video game; programmer role; Unity, C#; group project.
- **Anima** - 2D video game; programmer, designer & artist; Unity, C#; individual project.

LANGUAGES & ADDITIONAL SKILLS

Spoken Languages: Spanish (Native), English (Native), Portuguese (Intermediate), Finnish (Basic)

Additional Skills: Team collaboration and communication; adaptable and quick to pick up new tools and technologies.
